Story

Regarded as the fundamental of life since the early days of humanity, the soil maintains its existence by developing and transforming into various shapes. Taking design, technology and functionality together for half a century with the power it gets from this soil, Ege Seramik, continues its journey with the motto of "Perfect Nature, Perfect Beauty" and with a world class environmental friendly production and service approach.

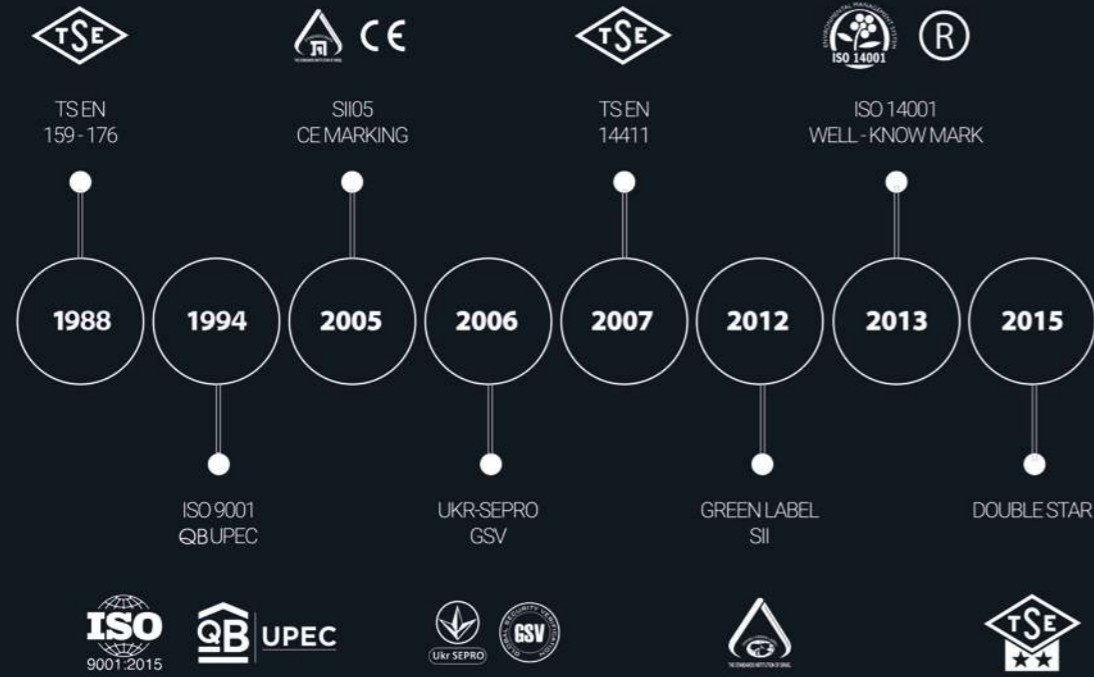

Ege Seramik is expanding its sales network everyday with the steps it has taken in line with its goal of becoming a stable "Glocal" player. Ege Seramik has maintained its innovative and dynamic structure since the day it was founded. Ege Seramik embraces the mission of being a company which does not follow the trends but creates them and this is reflected in its logo with the idea of always offering innovation and creativity.

Ege Seramik performs many firsts in terms of production, sales and marketing activities in the tile industry and it believes that high quality and customer satisfaction are indispensable for its success. The innovative product portfolio enhanced by unique design capabilities and high-tech materials responds to the demands of all international markets.

Ege Seramik is the first company that has environmental friendly production facilities with high recycling rates and runs its production, logistic and sales processes with high environmental awareness from the beginning till the end.

Ege Seramik, an Ibrahim Polat Holding subsidiary, has been successfully representing the Turkish ceramic tile industry both in Turkey and abroad for half a century since its foundation. With its steady performance, expert staff and ambition for further growth, Ege Seramik has been leading the fashion in the tile industry for half a century.

Explore the effects of different patterns and surfaces with a **strong approach**

Ege Seramik's glazed porcelain products which combine the esthetic and the advantages of glazed porcelain by blending them with one another are the most suitable covering material for intensively-used areas.

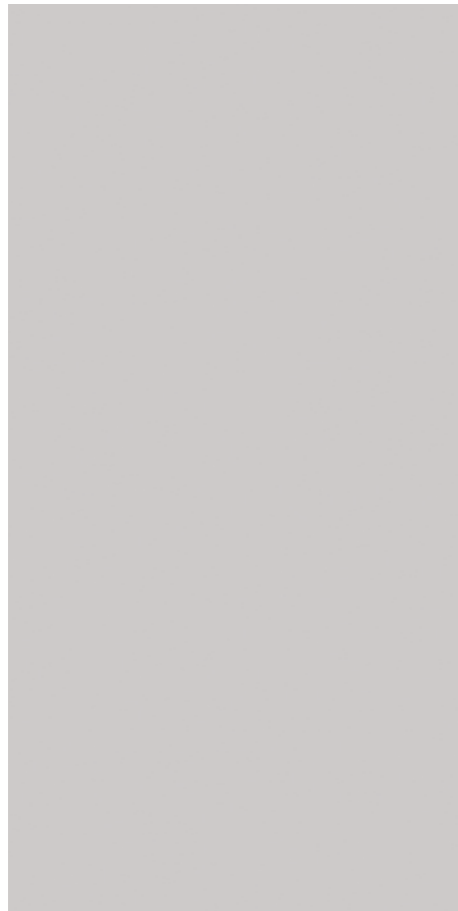

This stainless product group was designed for surfaces that are subject to abrasive materials and have a heavy traffic such as shopping malls, hotels, hospitals, and etc.

In addition to rich size and color options, opaque, bright, lappato and rectification processes can be applied on these products that are also environment-friendly.

Allow the reflection of perfect beauty to your living spaces with it's full polished surfaces.

According to the changes in the prints of pattern due to the design of our products, the color tone changes indicated on the labels of the boxes are made as follows. When it is opened 1 box from the product you purchased, changes in the patterns and views between the tiles found in the box are varied with respect to the design of the products.

V1 Uniform Appearance

Color and texture difference between the tiles from the same lot is very low because of the nature of the material.

V2 Slight Variation

There are clear differences in surface texture and printing patterns among the tiles having similar colors.

V3 Moderate Variation

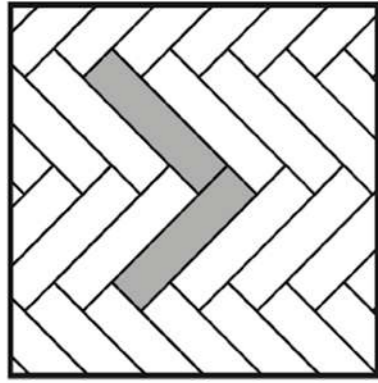

Main colors in one single tile can be found in other tiles. However color intensity shows differences between tiles. This is generally used in rustic tiles.

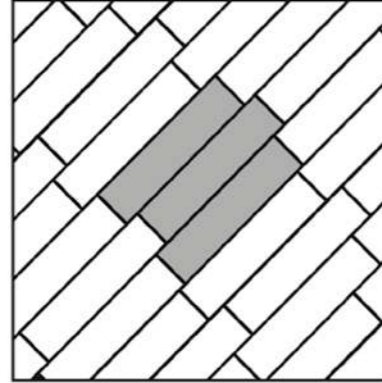

V4 Substantial Variation

Color differences can be observed from one tile to another. Thus, color of one tile can be different from another one. However, a harmony is observed between colors. These kinds of products can be found in the boxes in a random order. This is a design approach which is generally used in rustic tiles. Color and texture variation can be controlled in our facilities. This is a parameter and it is developed in the stage of product development as a requirement of market demands and design.
